

Rick Dever

Crestline Ca 92325

Dear Board of Directors,

With over 40+ years of experience in operating and managing water and waste water treatment plants, I feel that my extensive knowledge will provide insight to this critical industry and I will be able to answer questions and concerns on processes, treatments, and infrastructure. I am currently certified as a Grade V Wastewater Certificate Holder issued by State of California State Water Resources Control Board. Previously I have held a Grade V Certificate in Water Distribution and a Grade IV Certificate in Fresh Water Treatment, issued by the State of California Department of Public Health.

I bring a unique skill set, having been in operations and field maintenance, as well as management delegation for all these years. This career has given me extensive skills on the water and wastewater treatment and perspective. My experience has given me the knowledge on what will work and what will not, coming from actual hands-on experience.

I sought this appointment to be able to give something back. With all of my years in this industry, I can contribute to ensuring water quality. I will be able to tell when someone tries to "pull the wool over the eyes" when talking about what they can do and cannot do.

I moved to Crestline in 1974. 52 years of residency gives me a stake in my community that not many have. I would be honored to serve on the Board.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rick Dever', with a long horizontal line extending to the right.

Rick Dever
