

OPERATIONS MANAGER - STATUS REPORT

February 13th, 2025

Treatment Plants

The treatment plants continue to meet constituent discharge requirements on a routine basis.

Collection System

Crews are continuing with regular operations, daily inspections of District lift stations, issuance of correction notices for repairs on private laterals, and inspections on all repairs. Throughout the month, collection staff inspected waterways and the district effluent outfall line after all rain events. For January the district hydraulically cleaned 5,585 feet of line, and televised 276 feet of line.

Regulatory Compliance: District is maintaining a >90% compliance currently through the 2025 calendar year...i.e., < 2 SSO's, RWQCB Plant Discharge Requirements.

Facilities & Infrastructure

There have been no discharge violations due to equipment failure

Talking Points

- Construction continues on the plant upgrades continues as scheduled, The SCE Cutover has been tentatively rescheduled for February 25th, pending availability due to the wind outages lately taking up much of their staff.
- Exam preparation classes are continuing out at the plants, Senior Operators continue to mentor the OIT's and lower ranked Operators as they prepare for the exam process, Senior Operators and I have also started working with the Maintenance crew on exam prep and studying. Matt Mlynarski an Operator II with Collections experience has been a great help in this venture.
- PH and Leed electric were on site this week to do any last minute punch list work or fixes in preparation for the upcoming Edison Cutover.
- The Erosion Control project at Seeley Creek is drawing to an end. The upper drainage culvert has to be reinstalled and the Terra Mesh reinforced hillside still needs hydroseeding, management is reaching out to several contractors currently for quotes.
